EDUCATION

Covenant University — Bachelor of Science Computer Science, Ota, Ogun State | Expected Oct 2026

GPA: 4.96/5.0 | Relevant Coursework: *Object-Oriented Programming, Database Management Systems, Data Structures & Algorithms, Operating Systems, Computer Architecture, Computer Hardware, Computer Security, Data Communications & Networks*

SKILLS

Languages: Python, C, C++, C#, SQL, R, Visual Basic

Frameworks & Tools: Django, Git/GitHub, SQLite, MySQL, REST API design, HTML/CSS/JavaScript

Concepts: Full-stack development, backend engineering, OOP, database design, software development lifecycle, Agile principles, version control

Soft Skills: Problem-solving, communication, teamwork, adaptability

PROJECTS

CyberSim — Full-Stack Web Application with Adaptive AI Engine (Capstone, Python/Django · SQLite · JavaScript · Groq/LLaMA 3 API · Git)

- Designed and built a full-stack web application in Django/Python with a SQLite relational database, vanilla HTML/CSS/JS frontend, and a JSON API layer consumed by client-side JavaScript for real-time interaction.
- Integrated the Groq API (LLaMA 3 model) to generate personalised, context-aware post-session feedback, applying prompt engineering techniques to structure LLM output.
- Implemented a finite-state-machine adaptive difficulty engine (sliding window of 3 sessions) and a rule-based scoring algorithm that adjusts challenge level based on user performance history stored in the database.
- Architected seven distinct simulation scenarios (phishing, social engineering, credential harvesting, vishing, and more), each decoupled as independent modules and rendered dynamically through the Django template and URL routing system.

College Database System — Relational Database Design (MySQL · SQL)

- Collaborated with a team to design an entity-relationship model and translate business requirements into a normalised MySQL schema with referential integrity constraints.
- Authored and debugged SQL queries to resolve data anomalies and validate schema correctness.

EXPERIENCE

IpNX Nigeria Limited — Software & Network Operations Intern | Apr 2025 – Sep 2025

- Wrote Python scripts to monitor network performance and parse traffic logs, automating identification of latency anomalies and reducing manual diagnostic time.
- Documented service delivery workflows and produced weekly status reports, improving cross-team visibility and process repeatability.
- Communicated technical findings and troubleshooting guidance to non-technical stakeholders, bridging engineering and customer-facing teams.

Bulwark Services Limited — IT Support Intern | Mar 2025 – Apr 2025

- Diagnosed and resolved 20+ hardware/software tickets on Windows workstations, applying systematic troubleshooting to reduce mean resolution time.
- Configured and deployed desktop and network devices; maintained asset inventory and documentation in Excel.

CERTIFICATIONS

Endpoint Security — CISCO Networking Academy (Aug 2025)

Networking Devices and Initial Configuration — CISCO Networking Academy (Jun 2025)

Networking Basics — CISCO Networking Academy (May 2025)

Introduction to Cybersecurity — CISCO Networking Academy (Apr 2025)

Ethical Hacking — CISCO Networking Academy (Jan 2025)
